Sensitivity(true positive rate): 96.55% (95% CI, 93.05%~98.32%)			
Specificity(true negative rate): >99% (95% CI, 99.20%~100.00%)

Limit of Detection: 5×10^2 TCID ₅₀ /mL			

- Determine the probability of having Covid if you test positive
- Look into the variation of that probability with the base rate
- Determine the probability of not having Covid if you test negative
